About

Bio

I am a professional **full stack .NET developer** working mainly with web based technologies. My skillset is broad and encompasses data, server and front-end stacks; I also understand agile project methodologies. My strongest skill is optimising sites for mobile through design and slim-lining resources.

Looking for the right personality? I am an **ISTP** and would prefer not to be bound to one stack.

D.O.B

16th October 1991

Location

Crewe - willing to relocate in North UK.

Experience

2014 - Current

.NET Developer Commercial

Swansway Group

Working with a small team to implement features and maintain a websites and in-house software for our 20+ dealerships.
